*The CEFR (Common European Framework of Reference for Languages) provides a descriptive context that may be used to interpret the meaning and practical significance of scores on language tests. When language test scores can be related to CEFR levels, and this relationship can be adequately justified, the meaning of test scores and what candidates are likely able to do may be clearer. The mapping information and level descriptors are based on ETS research as reported in <https://www.ets.org/Media/Research/pdf/RM-19-10.pdf> and <https://www.ets.org/Media/Research/pdf/RM-21-01.pdf>.
